### **DETAILED ACTION**

1. This Office Action is the answer to the communication filed on September 6, 2000, which paper has been placed of record in the file.
2. Claims 1-24 are pending in this application.

### ***Election/Restriction***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-3 and 12, drawn to a system and method for operating on data representing a graph and produce data representing the linear combination of structured cash flow for the graph, classified in class 717, subclass 132.
  - II. Claims 4-11 and 13-24, drawn to a system and method for matching structured cash flows for exchange, classified in class 705, subclass 37.
4. The inventions are distinct, each from the other because of the following reasons:

Inventions are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. See MPEP § 806.05(d). In the instant case, invention has separate utility such as:

Inventions I and II have separate utility such as: the invention I drawn to a system and method for operating on data representing a graph and produce data representing the linear combination of structured cash flow for the graph; in contrast, the invention II drawn to a system and method for matching structured cash flows for exchange. Therefore, the invention I and II are shown to be separately usable.

Art Unit: 3628

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
